

# MEETING HUMAN NEEDS AND PROTECTING THE ENVIRONMENT

## Growing your business through innovation

Companies with sound sustainability programs are likely to be better managed and are able to deliver a better financial performance than others. At Keneos we apply the latest innovative SAP solutions to help transform businesses across a variety of industries and drive higher efficiencies, lower emissions and more social business practices.

### Future-Proof Solutions

In a world moving closer to a carbon-constrained economy, Keneos offers the depth and breadth of expertise necessary to safeguard the sustainability of your organization. Calling on the strengths of SAP technology, Keneos develops cutting edge solutions for managing change in the environment, health and safety (EH&S).

### SAP® Environment, Health, and Safety Management application

This product addresses:

- People Health & Safety: Supports the management of Health & Safety, industrial hygiene and occupational health processes, as well as compliance for product safety, hazardous substances, dangerous goods and waste management.

- Emissions Management: Helps to ensure compliance with environmental laws and policies as well as reduce associated costs, efforts and risks on plant and corporate levels.
- Product Safety & Stewardship: Helps to conform with product and material compliance regulations for all industries and secure the right to market products.

### Multidisciplinary Approach

From carbon trading and energy efficiency to product safety, hazardous substance management, dangerous goods management, industrial hygiene & safety, occupational health and waste management, Keneos applies a comprehensive approach combining production, financial management, information technology and related infrastructure.

### Reliable Partner

A pioneer of sustainability policies, Keneos was the first Belux EH&S partner for SAP. Keneos recently developed a SDM Roadmap to help organization from SDM Strategy to Business Success and Compliance.
